

# Steel Nameplates

## Etched & filled

- Enhance the appearance of your product with the attractive lifetime durability of steel, the proven standard for use in extreme environments.
- Avoid miscommunication and confusion that occurs when inferior nameplates degrade.
- Choose the permanent indelible graphics of etched steel and identify with durability that is unsurpassed.

## FEATURES

- Withstands the most severe environmental exposure for decades of dependable service.

### Conforms to Industry Standards:

MIL-DTL-15024F

ISO 15416

ANSI-X3.182-1990

RoHS, WEEE, REACH

as well as other applicable standards.

## GRAPHICS

- Traditionally produced with static data. But, you may order nameplates sequentially numbered or with any variable data scheme that you require.

## MATERIALS

- Stainless steel alloy 304 or 316 with #4 Brushed finish or 2B mill finish.
- Chemically deep etched .005" then filled with baked enamel paint for enhanced readability and superior durability.
- Available in thickness ranging from .018" to .036".
- Produced in virtually any size or shape.
- With one or more holes for mechanical attachment.
